

# WindowCal II™

Ritrama Inc. introduces an economical way to promote your product with an interior 2-way window advertisement. Window Cal II™ is a 2-mil white topcoated opaque polypropylene with white-pigmented adhesive (3-4525) designed for use as 2-way window graphics when used with products 3-7836 or 3-4595.

Product 3-7836 is a 3.5 mil gloss clear flexible vinyl with ultra removable adhesive designed for **UV ink jet** printed window graphics. Product 3-4595 is a 3.5 mil Advantage RI-cling™ gloss clear flexible vinyl with an ultra low removable adhesive designed for **general screen printing** as well as other printing methods.

The products are recommended for more than window graphics. They are also designed for applications including: point of purchase displays, product identification and promotional multi-color labels and decals.
